

## ARCHIE RUTHERFORD

I graduated from the University of the Witwatersrand in December 1989 with a Bachelor of Science degree in Civil Engineering. I subsequently was registered by the Engineering council of South Africa as a Professional Engineer and also hold a Higher Diploma in Arbitration as issued by the Association of Arbitrators (Southern Africa). I was a bursar with LTA Construction and as a result worked for them for a number of years, where I gained experience on larger construction projects including spending a year in Lesotho on the Highlands Water Project. In February 1994 I decided to branch off on my own and established Ruthcon Civil Contractors (Pty) Ltd, specializing in road and infrastructure projects. The company grew from humble beginnings, finally culminating in a buy-out by Sanyati Holdings Ltd in 2007. I am currently active as the Managing Director of Motheo Infrastructure Contractors (Pty) Ltd.

I have been married to Kathryn for 21 years and have two sons, Kent (16) and Justin (13). We live on a 600 hectare eco-estate in the south of Johannesburg. I have been Chairman on the Environmental Committee for the past 8 years. I also hold a FGASA Level 1 qualification, and have a very keen interest in all wildlife. I am a new member at Ingwelala, having only bought our bungalow, number 26, in July 2018.
